

VPTF3-28 Series

HIGH RELIABILITY COTS EMI FILTERS

DESCRIPTION

The VPTF3 series of COTS EMI filters is a cost effective solution for many demanding high reliability applications. A wide input voltage range accommodates nominal 28V inputs including avionics, mobile, ground systems, and other applications. The VPTF3 EMI filter is designed to filter the conducted emissions of multiple VPT series DC-DC converters up to its current rating, providing compliance to MIL-STD-461C/D/E for conducted emissions. A proven design heritage and a rugged all metal package ensure long term reliability.

The VPTF3 series is intended for harsh environments including severe vibration, shock and temperature cycling. Testing is to JESD22, MIL-STD-810, and MIL-STD-883.

These converters are designed and manufactured in the USA in a facility certified to ISO9001, J-STD-001 and IPC-A-610.

This product may incorporate one or more of the following U.S. patents:
